Full-Stack Web Developer

guiribacedrick03@gmail.com ☏ 0916 432 7703 ⊙ Tarlac City, PH ⬡ guiriba-portfolio.vercel.app

Full-Stack Web Developer with production experience across frontend, APIs, and data layers using the MERN stack. Graduated Cum Laude in Information Technology with a track record of clean code, iterative delivery, and measurable performance improvements. Comfortable owning features end-to-end — from UI to database — while collaborating effectively in agile environments.

▸ WORK EXPERIENCE

Full-Stack Developer · AltruePH

- Built scalable web applications end-to-end with React, Node.js, and MongoDB across multiple product releases.
- Improved application performance and UX, contributing to measurable gains in load speed and user retention.
- Developed RESTful APIs and integrated third-party services to extend platform capabilities.
- Participated in sprint planning, code reviews, and retrospectives in an agile team setup.

React · Node.js · MongoDB · Express.js · TypeScript · REST API

Full-Stack Developer · TRB Corp

- Developed and maintained a full-scale courier management platform supporting 50+ user types and role-based dashboards, covering order tracking to franchise operations management.
- Built frontend and backend systems using MongoDB, Express.js, React, Node.js, WebSockets, and Redis.
- Reduced system downtime by implementing CI/CD pipelines and Docker-based deployment workflows.
- Implemented JWT/RBAC authentication and OWASP-aligned input validation across all API endpoints.

▸ KEY PROJECTS

iDeliver — Courier Management Platform

Full-scale multi-role platform supporting 50+ user types: customers, VIP accounts, waiter accounts, and franchise entities. Features real-time order tracking, role-based dashboards, franchise operations management, and multi-branch support with live streaming.

MongoDB Express.js React Node.js Material UI WebSockets

WorkPulse — Workforce Management System

Workforce time-tracking and productivity platform with 4 user roles (Member, Manager, Super Admin, Client). Includes timesheet management, time-off requests, leave analytics, focus session tracking, and AI-assisted background removal for profile photos.

Node.js Express MongoDB React Tailwind CSS WebSockets

Barangay Information Management System

Full-featured civic system with census management, resident/household/blotter tracking, and area-based census assignment. Includes auto background removal for profile photos, PDF document generation, and multi-admin workflows.

MongoDB Express React Node.js Tailwind CSS

Footstep Power Generator — IoT Dashboard

Capstone project harvesting energy from footsteps via piezoelectric sensors embedded in a shoe, storing power in a battery through Arduino. Web dashboard shows real-time data: step count, timestamps, and energy output.
